EDUCATION

- **Norwegian University of Science and Technology**, Trondheim, Norway Spring 2026
Exchange Student in Computer Science and Engineering
 - Relevant Coursework: Digital Service Design, Software Security and Data Privacy, Cooperation Technology and Social Media Programming and Numerics.
 - Project Member, [Cogito](#) – Contributing to the design and development of AI-driven systems.
- **Indian Institute of Technology Kanpur**, India Spring 2025
Visiting Student in Computer Science and Engineering
 - Completed coursework and project in Big Data and Visual Analytics and Theory of Multi-armed Bandits.
- **Indian Institute of Technology Gandhinagar**, India Spring 2024
Visiting Student in Computer Science and Engineering
 - Completed coursework and projects in Machine Learning, Compilers, and Human-Computer Interaction, Design Thinking, strengthening problem-solving skills.
- **JK Lakshmipat University**, Jaipur, India 2022 - Present
Bachelor of Technology in Computer Science and Engineering
 - CGPA: 8.93 (out of 10)
 - 5 Times featured in the University Honors List for academic excellence.
 - Awarded a full merit-based scholarship in recognition of outstanding performance.

EXPERIENCE

- **[Bidovate Technologies Pvt. Ltd](#)** June 2025 - October 2025
Software Developer Intern
 - Developed Bid India (Previously Tender Bharat) - an AI-driven tender intelligence platform designed to help businesses discover, analyse, and securely compete for tenders across India.
 - Engineered an early version of web scraping system aggregating tenders from **32+ government portals**, forming a centralized normalized database.
 - Contributed to the end-to-end development of the platform by designing and implementing the frontend UI/UX in ReactJS and building core backend modules in FastAPI.
 - Developed core features: Advanced semantic tender search, AI-powered chatbot (TenderRobo), Real-time notification engine, Automated document synthesis and analysis.
- **Healthletic Lifestyle** April 2025 - May 2025
Backend Developer Intern
 - Developed and maintained core server-side functionality for a health-tech application.
 - Served as **Secondary Lead** for the Mobile Backend team, coordinating daily stand-ups, planning and assigning tasks for weekly sprints.
 - Designed APIs and structured database schemas to support key modules such as nutrition planning, calorie tracking, step monitoring, hydration tracking, and overall health management. Ensured data consistency, optimized query performance, and implemented modular backend services to support scalable applications.
- **Reinforce Software Solutions Pvt. Ltd** May 2024 - July 2024
FullStack Developer Intern
 - Revamped and maintained a full-featured HR Management Web Application, optimizing employee workflow management and administrative operations.
 - Redesigned frontend using ReactJS & TailwindCSS, improving responsiveness and UX. Designed and implemented RESTful APIs using Node.js and Express.js, handling authentication, employee records, attendance, and role-based access control.
 - Managed and structured data using MongoDB, and Optimized schema design and query performance.

- **JK Lakshmipat University**

- Teaching Assistant - **Data Structures and Algorithms***

August 2025 - November 2025

- Assisted in delivering the Data Structures and Algorithms course, supporting students during lab sessions and practical implementations.
 - Guided students in understanding core concepts and evaluated coding submissions, provided constructive feedback, and helped strengthen students' analytical and problem-solving skills.

- Teaching Assistant - **Probability and Statistics***

August 2024 - November 2024

- Supported the Probability and Statistics course by assisting students in understanding core concepts including data visualization, regression analysis, correlation, probability distributions, and hypothesis testing.
 - Guided hands-on implementation of statistical techniques using Python libraries such as NumPy, Pandas, and Matplotlib, applying theoretical concepts to real-world datasets.

PROJECTS

- **ScholarMind-2.0 - AI-powered research assistant**

- Designed and developed the platform that enables users to explore, analyze, and extract insights from academic research papers using Retrieval-Augmented Generation (RAG).
 - Built a RAG pipeline integrating large language models with vector-based retrieval to provide context-aware, citation-backed responses from research papers.
 - Designed a scalable backend using FastAPI, implementing modular API routes.
 - Developed document processing workflows for PDF parsing, chunking, metadata extraction, and embedding generation to enable structured knowledge indexing.
 - Created an interactive frontend using ReactJS and TailwindCSS, enabling dynamic querying, summarized insights, and structured paper exploration.

Tech Stack: ReactJS, FastAPI, Python, MongoDB, Retrieval-Augmented Generation (RAG), ChromaDB, TailwindCSS

- **[.meBlogs](#) - Online Publishing Platform**

- Designed and developed a full-stack online publishing platform enabling users to create, manage, and discover blog content through a modern and personalized experience.
 - Built a responsive frontend with dynamic content rendering, optimized layouts, and seamless writing experience to enhance user engagement and readability.
 - Developed a scalable backend supporting authentication, blog creation/editing, commenting, and personalized content feeds. Implemented API-driven data flow to manage posts, user profiles, and engagement metrics efficiently. Designed database schemas for optimized content storage, indexing, and retrieval to support growing user activity.

Tech Stack: ReactJS, Hono, Redux Toolkit (RTK Query), Database(PostgreSQL), TailwindCSS

SKILLS

- **Technical:**

- Programming Languages: C++, Python, Javascript, Typescript
 - Frameworks & Libraries & Databases: ReactJS, NodeJS, FastAPI, TailwindCSS, MongoDB, PostgreSQL
 - Tools: Git, Github, Docker

- **Other:**

- Leadership and Team Coordination, Problem-Solving, Communication, Time Management
 - Professional Language: English, Hindi

OTHERS

- **Freelancer - Web Developer**

- Designed and developed responsive websites for businesses, focusing on modern UI/UX, and client-specific requirements.
 - Led projects end-to-end, managing requirements, development, deployment, and direct client communication.
 - Sample project: [PoshPalate](#)

- **Organising Committee Member - Student Welfare**

- Coordinated and organized student trips across various parts of India.
 - Managed logistics, budgeting, team coordination, and event execution to ensure smooth operations.
